

REMARKS

Claims 1-11 are in this application and are presented for consideration. By this amendment, Applicant has amended claims 1, 2, 7 and 8.

Claims 1-11 have been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

Applicant has amended the claims paying close attention to the Examiner's remarks. Specifically, claims 1, 2 and 7 have been amended to clarify that the plate spring member is rotatable relative to the second bracket by rotation of the movable shaft. Claim 2 has also been revised to provide proper antecedent basis for the presser washer. Applicant has revised claim 8 to provide antecedent basis for the term "surface". It is Applicant's position that the claims as now presented are clear and fully comply with the requirements of the statute. Accordingly, Applicant respectfully requests that the Examiner remove the indefiniteness rejection in view of the claims as now presented.

It is believed that the claims are now in condition for allowance. However, the Examiner is invited to contact one of Applicant's representatives at the telephone listed below should there be any outstanding issues remaining.

Favorable consideration on the merits is requested.

Respectfully submitted
For Applicant,
